Pedro Beltran

I am a great candidate for the position of ASG President because I already have 2 years of experience in ASG. I have also served as ICC President, Puente Vice-President and in the Audubon club as an outreach member. Most of my leadership skills were developed during my first year in college thanks to the Puente program. After completing Puente and choosing my major in Sociology with an emphasis in education systems, I decided to join ASG. I began as an ICC representative and was elected to ICC President. Thanks to my position in ASG, I became a Peer Mentor for City College’s Upward Bound program working with high school students. If I am elected President, I will do my best to create a better system of student connection with ASG. Despite everything, I am still a student who struggles every single day to complete his education and I relate to students.

My focused goal with the Associated Student Government (ASG) has always been centered around involvement. What is important to me is establishing a strong teamwork with good work ethic that is centered towards furthering the development of not just an institution but each individual student as well. When I joined ASG, my initial goal was to use the skills I have acquired and use them to give representation to each student on campus. While doing this, I found that certain task really helped to develop and become a stronger individual. This has inspired me to want to continue to build a strong relationship between students and the ASG and is the reason why I am running for ASG President.

I am a political science major who plans on pursuing a career as an immigration lawyer. “University of San Diego California is my dream school! I am the former president of H.U.B.U, a learning community that focuses on the success of African American & Latino males. “I have also served as a student senator for the Associated Students Government (ASG) and currently work as a Student Ambassador on campus. I understand the needs of prospective students, incoming students and current students. It is important to find a sense of unity, diversity & a feeling of belonging at San Diego City College. I love the students, staff and faculty who have played a key role in my success as a student. City has become my home. Dreaming big to me means of being able to represent the entire student as ASG President. VOTE this September 24th & 25th Your Vote Matters! Your voice should be heard! “

Running For President
Javier Valle

I have worked in ASG for over four years and held various positions and am familiar with all board positions. I have demonstrated leadership in all of my roles and promoted teamwork to accomplish many goals that benefit and support students. For example, we collaborated with California Coast Credit Union to create the annual Food for the Holidays event and gave students with food insecurities $40 grocery cards to help during the holiday season. Over 35 students are awarded yearly! I also represented San Diego City College at the Student Senate of California Community Colleges with over 115 other colleges. My experience in leadership and existing relationships with members at other colleges in our region makes me the perfect candidate for this position as it requires a lot of interaction with region and cabinet members of the Board of Trustees. My experiences in ASG makes me the best candidate for ASG President. I am in a great position to lead the ASG and represent the students of San Diego City College to the best of my abilities and appreciate your vote on election day!

Jacqueline Alvarez

I am a first year Puentista and seeking to create change for our school community and want to become a representative of the students at City College. I want our school to be a safe environment for all students because it’s one of the places we spend the most time in and it is necessary for students to feel like this is their second home. A place where there’s no judgment for the color of your skin, race, religion or sexuality. I seek involvement and to bring all of the San Diego City College students closer and familiar with all the college has to offer. I want to show everyone that this community can bring the best out of everyone and be their voice. It will be an honor for me to make all voices to be heard and be the representative I can be.

Running For Senator
My purpose for when I become senator is to be the voice of those who can’t give their points of view or their opinions. I used to be the shy student who would sit in the corner of the classroom. I know what it feels to be afraid of speaking, so I want to make San Diego City College a campus where everyone feels comfortable to speak out regardless of their ethnicity, economic situation, the time they have as college students, etc. I would like students to be more aware of the events that happen around campus, so they can be more involved with clubs or conferences. I feel that there are many benefits here on campus that many students don’t know about. That’s why I’m running for senator to promote all this awesome things and at the same time I will be helping my community.
Keith Dolderer

The position of senator is a simple role and believe its role should be done as any civil servant: serving the people that are represented. The people that I represent are the members City College that are students. As a student I understand the expressed frustrations from changes that are needed but have not been implemented on campus. Knowing these frustrations, I will maintain a line of open communication meant for the individual or large groups of people that need to express changes they see fit.

The reason I'm running as Senator in Student Government is to become a voice for the students. Secondly I want to create a change in this school, and obviously make sure every student is heard. I want to assure all of my fellow classmates feel comfortable in the school environment. As a first year college student I especially want to be a voice for my generation and help them in any way possible that will benefit all of them. I’ll be honored in becoming a Senator for this campus, thank you.
Victoria Boahemaa Owusu

I’m an immigrant from West Africa, Ghana. I came here to the United States almost three years ago. I choose to run for senator because this is where I see myself using my strengths. I’m always positive about things, harmony is also one of my strengths and I’m futuristic as well. I believe everything in this universe must be done with a positive mind in order to achieve a positive outcome. Therefore, I believe, once I’m elected as a senator, I’ll always bring positivity to the board. I’ll always seek for us to think ahead of time, think about situations that can help every student on campus, not just the current situations. I’ll be able to dive into student issues while collaborating with the team. As an African, there’s a proverb that goes “it takes a whole village to raise a child.” Therefore, it will take me, you, everybody on campus to make San Diego City College a better place to achieve our education.

Running For Senator
Nicolas Ruvalcaba

If I get elected to be senator for ASG, I will do my best to offer my services to who needs help within the community. For my part as a senator, I would like to be involved with any issues that we can solve as a group. Or when other people attend our meetings with any discussion, I’ll like to make any agreements given during the meeting. I’ll be there to listen and discuss any questions given to agree or solve any service needed for our campus. As ASG senator, I know that I’ll have responsibilities on my own, but I’ll be glad to take part in being involved. I understand that being part of a community takes time to grow in which I’ll like to be part of the growing process.

Running For Senator
I have previously had the honor to be the Public Relations Officer of ASG last semester, and want to run for PEC. I am apart of 4 clubs on campus am at school every day and want to continue improving the campus experience. If I were to be elected, I want to work with the rest of ASG and make the full campus experience accessible to all students.
